Patient Education Insert

-Apply medication to affected area as prescribed

This medication was compounded by a pharmacy per prescriber request. For external use only. Wash hands before and after use unless the medication is for your hands. Store at room temperature (68 to 77 degrees Fahrenheit). Keep away from children and pets. Do not flush unused medications or pour down a sink or drain. Do not swallow and avoid contact with eyes.

Do not use more than your medical provider has instructed you to use. Do not use more often or for longer than you were instructed. Doing any of these may increase the chance of undesirable side effects.

The "Do not use after" date printed on the prescription label is generated using State & Federal compounding laws. Some preparations are made 1-3 days before the prescription is issued, in anticipation of expected demand. If you have any questions or concerns regarding this, please do not hesitate to call and speak to one of our pharmacists.

Do not use if an allergic reaction occurs due to any of the listed active ingredients on the prescription label. Signs of an allergic reaction may include rash hives itching shortness of breath wheezing cough swelling of face, lips, tongue or throat or any other signs.

Contact your medical provider or pharmacy if you have concerns about listed side effects or if you experience unexpected irritation. Notify your medical provider of any medical updates and of all drug changes including over-the-counter and herbal medications.

If you miss an application, apply as soon as you remember. If it is close to the next application, skip the missed application. Do not double applications.

We want to offer you the best service possible. In the event you have a concern or complaint please call the pharmacy at 385-900-1400.

Your medication contains the following active ingredients. Please review the following:

Pyridoxine: Chemical name for Vitamin B6. Pyridoxine is believed to have a major impact on the skin.

When vitamin B6 levels are insufficient, inflammation of the skin can develop, in particular seborrheic dermatitis. Vitamin B6 used to be called anti-dermatitis factor and is also one of the main ingredients in topical treatments for seborrheic dermatitis.

Unwanted side effects are uncommon and are likely minimal, such as minor skin irritation and potential redness. Contact your doctor if you experience any severe reactions such as pain, swelling, hives or trouble breathing.

Hyaluronic Acid 1% - Is used to treat dry, scaly skin, such as that caused by atopic dermatitis.

Topical application of hyaluronic acid has very few potential side effects which include:

Redness, itching, skin pigmentation

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away.
