-Apply medication to affected area as prescribed

This medication was compounded by a pharmacy per prescriber request. For external use only. Wash hands before and after use unless the medication is for your hands. Store at room temperature (68 to 77 degrees Fahrenheit). Keep away from children and pets. Do not flush unused medications or pour down a sink or drain. Do not swallow and avoid contact with eyes. Do not use more than your medical provider has instructed you to use. Do not use more often or for longer than you were instructed. Doing any of these may increase the chance of side effects.

The "Do not use after" date printed on the prescription label is generated using State & Federal compounding laws. Some preparations are made 1-3 days before the prescription is issued, in anticipation of expected demand. If you have any questions or concerns regarding this, please do not hesitate to call and speak to one of our pharmacists.

Do not use if an allergic reaction occurs due to any of the listed active ingredients on the prescription label. Signs of an allergic reaction may include rash hives itching shortness of breath wheezing cough swelling of face, lips, tongue or throat or any other signs.

Contact your medical provider or pharmacy if you have concerns about listed side effects or if you experience unexpected irritation. Notify your medical provider of any medical updates and of all drug changes including over-the-counter and herbal medications.

If you miss an application, apply as soon as you remember. If it is close to the next application, skip the missed application. Do not double applications.

We want to offer you the best service possible. In the event you have a concern or complaint please call the pharmacy at 385-900-1400.

Your medication contains the following active ingredients. Please review the following:

Erythromycin is an antibiotic that fights bacteria and is commonly used to treat acne vulgaris & may also be used for purposes not listed in this medication guide.

You should not use erythromycin topical if you are allergic to it.

Tell your doctor if you are pregnant or breastfeeding.

Do not take by mouth. Topical medicine is for use only on the skin.

Wash your hands before and after using erythromycin topical. Clean and dry the treatment area before application.

Store at room temperature away from moisture and heat.

Get emergency medical help if you have signs of an allergic reaction: hives difficult breathing swelling of your face, lips, tongue, or throat.

Call your doctor at once if you have: severe burning, stinging, or redness oozing or other signs of skin infection worsening of your skin condition or severe stomach pain, diarrhea that is watery or bloody (even if it occurs months after your last dose).

Common side effects may include: skin itching, redness, burning, or peeling or dry or oily skin. This is not a complete list of side effects and others may occur.

Niacinamide – Topical anti-inflammatory

When applied topically, niacinamide has been shown to have anti-inflammatory effects on the skin. It has been used to treat skin conditions like acne and rosacea, a facial skin disorder characterized by redness.

Possible side effects include: mild burning, itching, or redness.
