## Patient Education Insert

- Apply medication to affected area as prescribed

This medication was compounded by a pharmacy per prescriber request. For external use only. Wash hands before and after use unless the medication is for your hands. Store at room temperature (68 to 77 degrees Fahrenheit). Keep away from children and pets. Do not flush unused medications or pour down a sink or drain. Do not swallow and avoid contact with eyes. Do not use more than your medical provider has instructed you to use. Do not use more often or for longer than you were instructed. Doing any of these may increase the chance of undesirable side effects.

The “Do not use after” date printed on the prescription label is generated using State & Federal compounding laws. Some preparations are made 1-3 days before the prescription is issued, in anticipation of expected demand. If you have any questions or concerns regarding this, please do not hesitate to call and speak to one of our pharmacists.

Do not use if an allergic reaction occurs due to any of the listed active ingredients on the prescription label. Signs of an allergic reaction may include rash hives itching shortness of breath wheezing cough swelling of face, lips, tongue or throat or any other signs.

Contact your medical provider or pharmacy if you have concerns about listed side effects or if you experience unexpected irritation. Notify your medical provider of any medical updates and of all drug changes including over-the-counter and herbal medications.

If you miss an application, apply as soon as you remember. If it is close to the next application, skip the missed application. Do not double applications.

We want to offer you the best service possible. In the event you have a concern or complaint please call the pharmacy at 385-900-1400.

Your medication contains the following active ingredients. Please review the following:

Thymol - is an anthelmintic medication that fights infections caused by fungus & parasites.

Thymol topical nail solution is used to treat funga & parasitic nail infections such as onychomycosis, also known as tinea unguium, and may also be used for purposes not listed in this medication guide.

You should not use thymol topical if you are allergic to it.

It is not known whether thymol will harm an unborn baby. Tell your doctor if you are pregnant or plan to become pregnant.

It is not known whether thymol passes into breast milk or if it could harm a nursing baby. Tell your doctor if you are breast-feeding a baby.

Wash your hands before and after using this medicine.

Clean and dry the affected area. Apply the medicine as directed.

Use this medicine for the full prescribed length of time. Your symptoms may improve before the infection is completely cleared.

Call your doctor if your symptoms do not improve, or if they get worse.

Keep the medicine container tightly closed when not in use.

Store at or slightly above room temperature as the solution base has a high freezing point 20 C or 68 F.

If crystals or cloudiness form, place glass vial in a warm glass of water to the solution line for 20 min, or run under warm water until clear.
